# EuroSheet 8

POLY-COATED INTERLEAVING PAPER

EUROSHEET 8

EuroSheet is a poly-coated paper sheet that may be used to interleave circuit boards during the shipping process. It offers surface protection of the finished circuits during transportation. It is available in white color only and is single-use. EuroSheet is available in .008" (0.20 mm) thickness.

BENEFITS

- Should be used during shipping and transportation
- Reduces surface-to-surface scratches
- Low coefficient of friction, ie: slippery surface
- Sheets are easy to cut to size, or they can be ordered pre-cut
- Clean fiber-free, sulfur-free, releasable surface
- EuroSheet is both chemical and moisture resistant
- Easy to cut down to size, as required

MATERIAL PROPERTIES

Color	90 White
Surface	Poly Gloss 70, Opacity 99
Content	Acid-free, Chlorine-free, Sulfur-free
Panel Sizes	18 x 24", 21 x 24", other TBD
Thickness	.008" (0.20 mm), other TBD
